An end

or a beginning?

There was a time when a high school diploma could be considered an end — sufficient education for the job ahead. But no more. Not in these days of ever-advancing technology and intense individual competition. Now, whether you're planning on a white-collar or blue-collar job, the requirements are much the same — more knowledge, more skills, **more education**. And that means study beyond high school.

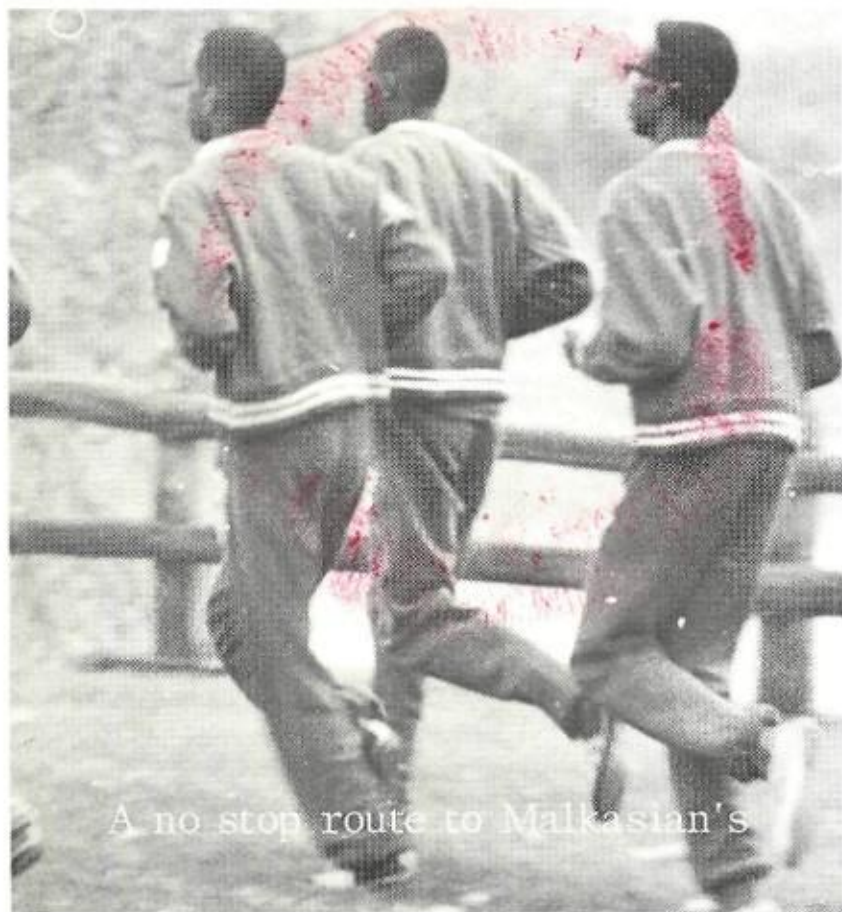

The decision is yours. Make it carefully, for it will probably be the most important one you'll ever make. We at Allis-Chalmers hope it will be for further study. Deeply involved in space-age technology ourselves, we know first-hand the crucial importance of special skills and education. Just as you will, in the future—**when it counts.**
